ROWANS PRIMARY - EXPLORE - SCIENCE
TERM 5 - PLANTS AND GROWTH

LESSON 1

Learning Intention:

To identify common wild and garden plants and recognise basic plant structures.

LESSON 2

Learning Intention:

To investigate seeds and bulbs and describe what happens during germination.

LESSON 3

Learning Intention:

To investigate how water affects seed germination and plant growth through a simple comparative test.

LESSON 4

Learning Intention:

To investigate the importance of light and suitable temperature for healthy plant growth.

LESSON 5

Learning Intention:

To observe, measure and record how plants grow over time, including the development of roots, stems and leaves.

LESSON 6

Learning Intention:

To apply scientific knowledge to care for plants, interpret evidence and communicate conclusions.
